Group 15's Contract

Our goal is to be the best team possible, which includes working together to present a cohesive project. To avoid stressful situations we've experienced in the past, we have all agreed to the established ground rules below.

Ground Rules

- We will do our best to complete the assignment 24 hours ahead of the deadline to avoid a last minute scramble.
- To coordinate responsibilities, we will maintain consistent communication on Discord, and schedule meetings to work together, which includes but is not limited to utilizing dedicated class time and calling via Discord. We will also provide status updates and ask questions for clarification.
- To effectively work together, we will run decisions and changes by everyone in the group.
- Everyone is in charge of the assignment equally. We will hold each other accountable for delegated responsibilities and meeting personal deadlines.
- Everyone in the group will be open-minded and listen to feedback from every group member.

We hope to avoid the stress of cramming a group project last minute by establishing a clear timeline for our workflow. We all agree to this group contract to effectively work together for all group assignments in CS250.
